## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Priority*

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-6 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Zhou (US 5,953,469) cited by applicant.

Re claims 1 and 8: Zhou discloses a display device comprising a first light guide (20 in Fig. 3), a movable element (30) and selection means (71 and 72) for locally bringing the movable element into contact with said light guide, characterized in that the display device comprises a second light guide (40), wherein said movable element (30) is arranged in between said light guides, and wherein said selection means are arranged to locally bring the movable element into contact with a selected one of said light guides.

Re claims 2-4: Zhou teaches that said movable element is reflective ( 31 and col. 10, lines 31-35) or transparent (30c, 30d (col. 11, lines 20-21). Zhou further discloses row and column electrode (Fig. 5A-C)

Re claims 5-6: Zhou discloses LEDs as light-emitting means for emitting UV radiation (col. 16, lines 60).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Zhou.

Re claim 7: Zhou does not specifically teach that the light-emitting means are arranged to alternatively introduce into the first and second light guides. However Zhou discloses two light sources (60 and 66) disposed at opposite ends of a waveguide. Further he teaches other variations in light-coupling method are possible. It would have been obvious to one having ordinary skill in the art at the time the invention was made to arrange Zhou's light-emitting means to alternatively introduce light into the first and second light guides because of Zhou's teachings above.
